Summary

Curiosity is the spark behind every great idea. The future belongs to the curious, and I've built my career around a passion for innovation and the relentless pursuit of knowledge within the tech industry.

Hi there! I'm a blend of technologist, strategist, and storyteller, dedicated to transforming complex technical concepts into compelling narratives that resonate with customers and stakeholders alike. My career tapestry is woven with roles that have not only pushed the envelope in technology but also fostered deep, meaningful connections.

Here's what sets me apart in a digital sea of professionals:

- A creative problem-solver who thrives on finding elegant solutions to intricate challenges.
- A history of leading cross-functional teams to success, marked by increased efficiency and groundbreaking product launches.
- An advocate for purpose-driven innovation, I measure success not only in revenue growth but in the positive impacts on society and the environment.
- A continuous learner, I'm always on the lookout for the next skill to master or domain to explore, leading to a diverse skill set ranging from AI to cloud computing.

I'm driven by the thrill of turning the 'impossible' into 'accomplished', whether that's through spearheading a disruptive tech project or mentoring the next generation of thought leaders. My professional journey is a testament to the power of blending technical acumen with empathetic leadership.

If you're an industry peer, recruiter, or a potential client interested in harnessing the power of technology to create impactful solutions,

let's connect! I'm always open to discussing new projects, industry trends, or collaborative opportunities.

Key Skills: Strategic Planning, Team Leadership, Innovative Tech Solutions, Stakeholder Engagement, Continuous Learning

Experience

MRO

Senior Advisor - Software Engineering

March 2025 - Present (5 months)

Pune, Maharashtra, India

As a Senior Advisor at MROCorp, a key player in the healthcare and clinical data management space, I contribute to the architecture and development of secure, scalable software systems aimed at transforming the way clinical data is processed, accessed, and utilized across the healthcare ecosystem. My role involves ensuring high performance, reliability, and strict compliance with regulatory frameworks such as HIPAA.

Initial Focus Areas & Responsibilities:

- Collaborating with cross-functional teams to architect and implement scalable web applications and microservices using React and .NET, deployed on Azure (and potentially Google Cloud).
- Building secure, cloud-native solutions that handle large volumes of sensitive healthcare and clinical data while ensuring compliance with industry standards.
- Contributing to CI/CD pipelines, containerization strategies using Docker, and Kubernetes orchestration to enable seamless deployment and environment scalability.
- Exploring best practices in observability, performance monitoring, and DevOps integration to ensure system reliability and maintainability from day one.
- Actively ramping up on domain-specific knowledge to align technical solutions with clinical workflows and operational needs in the healthcare domain.

Nagarro

Staff Engineer

May 2022 - March 2025 (2 years 11 months)

Pune, Maharashtra, India

As a Staff Engineer at Nagarro, a leading global provider of digital engineering and technology solutions, I drive the development of cutting-edge web applications for a diverse clientele, with a particular focus on optimizing airline operations for enhanced efficiency and cost savings.

Achievements:

- Spearheaded the development of a custom table component using React.js and MUI5, replacing a costly third-party solution and resulting in the performance improvement for a critical airline scheduling application.
- Designed and implemented interactive data visualization dashboards using ChartJS, empowering stakeholders with real-time insights and improving decision-making processes for key airline operations.
- Led a team of developers, providing technical guidance and mentorship, fostering a collaborative environment that consistently delivered high-quality solutions within aggressive timelines.
- Successfully optimized user interfaces for multiple scheduling applications, significantly improving usability and user satisfaction, as evidenced by a major reduction in user support tickets related to application navigation.
- Collaborated closely with product owners and stakeholders to translate business requirements into technical specifications, ensuring that solutions were aligned with strategic objectives and delivered measurable business value.

HARMAN India

Technical Lead

February 2020 - January 2022 (2 years)

Bengaluru, Karnataka, India

As Technical Lead at HARMAN India, a subsidiary of Samsung Electronics focused on connected technologies for automotive, consumer, and enterprise markets, I led a team of developers to deliver high-quality software solutions for Microsoft's internal projects. My role involved seamless integration of front-

end and back-end technologies, ensuring optimal application performance and adherence to enterprise standards.

Achievements:

- Architected and developed a dynamic UI framework using React, Redux, and ES6, leading to a significant increase in user satisfaction as measured by internal surveys.
- Developed RESTful APIs and backend services using .NET Core and WebAPI, providing critical support for front-end functionalities and seamless data integration, resulting in an improvement in application response time.
- Successfully managed the project lifecycle from conception through deployment, consistently delivering projects on time and within budget, as evidenced by the on-time delivery rate for projects under my leadership.
- Mentored and guided junior developers, fostering a collaborative and high-performing team environment, leading to an increase in team productivity and code quality.

Digital Juice

Software Engineer

November 2014 - February 2020 (5 years 4 months)

Bengaluru Area, India

As a Software Engineer at Digital Juice, a leading provider of digital content for creative professionals, I played a key role in developing and enhancing full-stack applications for the company's e-commerce platform and customer engagement tools. My contributions focused on improving user experience, streamlining content delivery, and enhancing overall platform functionality.

Achievements:

- Developed key features for the e-commerce site that led to a major increase in user engagement and a rise in online sales.
- Engineered advanced search functionality for the e-commerce platform, resulting in an improvement in content discoverability and a reduction in customer support inquiries related to search.

- Developed and implemented admin tools that streamlined content management processes, leading to an increase in team efficiency and faster content publishing cycles.
- Collaborated effectively with cross-functional teams, including design, marketing, and customer support, to ensure successful project delivery and alignment with business goals.

GlobalTech Solutions

Intern

December 2012 - June 2013 (7 months)

Nashik, Maharashtra, India

During my internship at GlobalTech Solutions, a leading provider of software solutions for businesses, I gained valuable hands-on experience in developing Windows and web-based applications. I actively participated in all stages of the software development lifecycle, from requirements gathering to deployment, focusing on creating internal tools to enhance business processes.

Achievements:

- Developed and implemented a Windows-based application using the .NET framework to automate a key business process, increasing team efficiency.
- Designed and developed a data-driven web application using ASP.NET and SQL Server, enabling improved data analysis and reporting for a critical business function.
- Successfully collaborated with senior developers, adopting best practices for code quality, version control, and documentation.
- Demonstrated strong problem-solving skills, effectively troubleshooting technical challenges and proposing innovative solutions.

Education

Savitribai Phule Pune University

Master's degree, Computer Science · (June 2011 - May 2013)

Subhash Programming Classes

Certificate in Advanced Programming, Advanced C, Data Structure and C++
Programming · (June 2014 - November 2014)

Savitribai Phule Pune University

Bachelor's degree, Computer Science · (April 2008 - April 2011)
